

# Core

## Thermal insulation that meets the core needs for your next project

Bradford Core is a new addition to the Bradford insulation range, combining trusted quality with consistent thermal performance to meet the essential needs of modern residential construction. This glasswool insulation is non-combustible and reduces heat transfer around the home to improve year-round comfort and energy efficiency.

Developed to help meet the demands of everyday building requirements, the Bradford Core Range gives builders the flexibility to choose the right insulation options for their project needs.

### Key product benefits for homeowners

-  **Thermal performance** – helps keep your home cooler in summer and warmer in winter – making it more comfortable all year-round.
-  **Energy efficiency** – help reduce the home's ongoing energy costs by increasing the level of thermal insulation.
-  **Fire-safety** – manufactured from non-combustible glasswool for reduced fire risk and added peace of mind.
-  **High recycled content** – glasswool insulation that contains up to 80% recycled content.

## Confidence for builders and installers

**Easy to install** – consistent cut and compression packing allows for simple and fast installation on site.

**Meets Australian Standards** – rigorously quality tested to ensure consistent performance and compliance.

**NCC compliant** – ensures compliance with energy efficiency standards set by the National Construction Code.

**Trusted brand** – backed by Bradford, Australia's most experienced insulation manufacturer, delivering reliable technical expertise and national support.

# Product solutions to meet NCC compliance

For residential applications, Bradford Core delivers dependable thermal performance for everyday building requirements. Pair Bradford Core with Bradford Gold perimeter ceiling batts and Bradford perimeter spacers to achieve increased thermal performance and support NCC 2022 energy efficiency and condensation management requirements.

Designed to maintain a continuous 20 mm ventilation gap at the roof edge, the Bradford perimeter batt and spacer work together to ensure an airflow pathway into the roof space.

Bradford Gold perimeter batts provide high R value performance in tight spaces near the eaves, while

the Bradford Perimeter Spacer creates a consistent separation between insulation and the roof or sarking to support effective condensation management. When installed together with Bradford Core, these solutions help boost overall thermal performance and assist builders in staying compliant with NCC requirements.

## 70 Year Warranty

Bradford provides a comprehensive 70 year warranty on all Bradford Core products. Visit [csrbradford.com.au](https://www.csrbradford.com.au) for more information.
